

ELITE ESP

EXTRA SHOCK PROTECTION

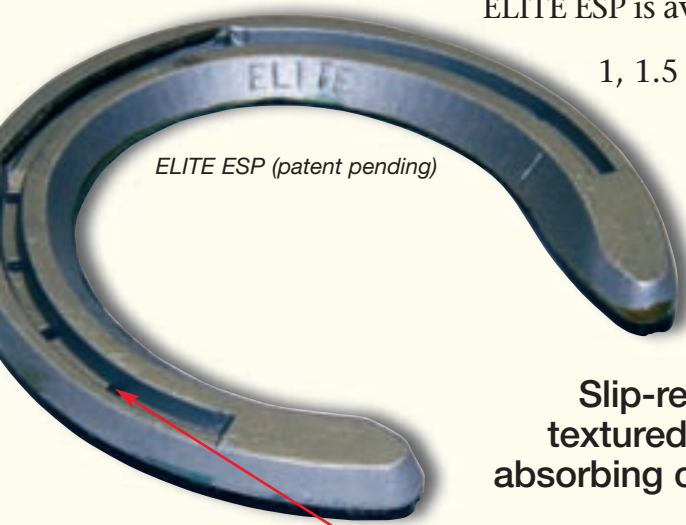

Studies have proven that aluminum horseshoes absorb more of the shock of ground impact than steel horseshoes. Studies have also proven that aluminum combined with urethane reduces the shock of ground impact by up to 75%!

The ELITE division of VICTORY is pleased to announce the introduction of ELITE ESP-Extra Shock Protection. This newest addition to the farrier's arsenal provides a slip-resistant textured shock

absorbing coating applied to the hoof side of an ELITE Competition Shoe. The inside edge is beveled for sole pressure relief and holes in the urethane coating make the job of driving a nail easier and more accurate! Tough and durable, the

Aluminum combined with urethane reduces the shock of ground impact by up to 75%!

ELITE ESP is available in sizes 00, 0, 0.5, 1, 1.5 and 2 in flat style only.

ELITE ESP (patent pending)

Beveled inside edge for sole pressure relief

Slip-resistant textured shock absorbing coating
